The MAILING DATE of this communication appe	Sumesh Kaushal Ph.D.	1636				
THE REPLY FILED 01/02/04 FAILS TO PLACE THIS AF Therefore, further action by the applicant is required to av final rejection under 37 CFR 1.113 may only be either: (1) condition for allowance; (2) a timely filed Notice of Appeal Examination (RCE) in compliance with 37 CFR 1.114. PERIOD FOR RE	PPLICATION IN CONDITION FOr coid abandonment of this applicate a timely filed amendment which (with appeal fee); or (3) a timely PLY [check either a) or b)]	OR ALLOWANCE.	y to a			
a) The period for reply expiresmonths from the mailing date of the final rejection. The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In overall, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
 1. A Notice of Appeal was filed on Appellant's 37 CFR 1.192(a), or any extension thereof (37 CFR 2. The proposed amendment(s) will not be entered be 	Brief must be filed within the per 1.191(d)), to avoid dismissal of	riod set forth in the appeal.				
(a) they raise new issues that would require further consideration and/or search (see NOTE below);						
 (b) ☐ they raise the issue of new matter (see Note below); (c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or 						
(d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims. NOTE:						
3. Applicant's reply has overcome the following rejection	in(s):					
4. Newly proposed or amended claim(s) would b canceling the non-allowable claim(s).	e allowable if submitted in a sep					
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reapplication in condition for allowance because: See	econsideration has been conside Continuation Sheet.	ered but does NOT	place the

PTO-303

Continuation of 5. does NOT place the application in condition for allowance because: Claims 1-2, 17, 20, 22-25 and 34-38 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The applicant argues that claim 1 has been amended to recite "plasmid replication protein". The applicant further argues that given the limited scope of the term "replication protein" as defined and used in the specification, Applicants submit that the term, in combination with the stated hybridization conditions, does indeed provide structural and physical characteristics that will provide notice to the person of skill in the art that the inventor was in possession of the invention as claimed.

However, this is found NOT persuasive because claim 1 as amended fails to meet written description requirement. The invention as claimed reads upon a nucleotide sequence obtained form any organism that is essential for its replication. Since every protein in a microorganism is considered essential for its replication or replication of a plasmid within the organism, mere recitation of claim limitation "plasmid replication protein" has failed to distinguish the claimed nucleotide sequences from any other protein, which is considered essential for its replication. The specification as filed fails to disclose any variant of SEQ ID NO:2 that one skill in the art would be able to identify by any structural and physical characteristics. Under the law the possession may be shown by actual reduction to practice, clear depiction of the invention in a detailed drawing, or by describing the invention with sufficient relevant identifying characteristics (as it relates to the claimed invention as a whole) such that a person skilled in the art would recognize that the inventor had possession of the claimed invention. See, e.g., Pfaff v. WellsElectronics, Inc., 525 U.S. 55, 68, 119 S.Ct. 304, 312, 48 USPQ2d 1641, 1647 (1998); Eli Lilly, 119 F.3d at 1568, 43 USPQ2d at 1406; Amgen, Inc. v. Chugai Pharmaceutical, 927 F.2d 1200, 1206, 18 USPQ2d 1016, 1021 (Fed. Cir. 1991). In the instant case SEQ ID NO:2 or its variants has been defined only by a statement of function "plasmid replication protein" which conveyed no distinguishing information about the identity of the claimed DNA sequence, such as its relevant structural or physical characteristics. According to these facts, one skill in the art would conclude that applicant was not in the possession of the claimed genus because a description of only one member of this genus is not representative of the variants of genus and is insufficient to support the claim.
